

**PROFESSIONALLY  
MANAGED**

# IT (Information Technology) FOR YOUR BUSINESS

In today's world, running a business is becoming more and more complex. Cyberthreats to your operations are increasing every day.

Our mission is to transform how our clients realize and deliver value from technology in a secure way. Valceon Technology is an IT Risk Management company that provides peace of mind that your operations are **SAFE, SECURE**, and run **SMOOTHLY**. Our main focus is **PROTECTING** and your business!

**PLAN**

in a SMART WAY

**YOUR  
BUSINESS**

**PERFORM**

Operations in a  
EFFICIENT WAY

**PROTECT**

in a SECURE WAY

**HOW DO YOU KNOW YOUR BUSINESS IS SECURE?**

## WHY VALCEON

Your company's expertise is an invaluable asset. You market and deliver that expertise via email, smartphones, unified communications, billing programs, and a host of cloud-based applications. Technology is the backbone of your company, and if it breaks, the consequences are severe... **LOST CLIENTS, LOST PRODUCTIVITY, LOST DATA, AND LOST BUSINESS!**

Valceon Technology can provide secure managed information technology (IT) services, so you can right-size your investments in technology and dramatically improve your business performance and security.

## SECURE IT COSTS LESS

Are you throwing dollars at technology to try and solve a problem or do you really need a plan? Letting Valceon manage your IT needs on a predictable and affordable monthly basis means fewer emergencies and costly site calls. Our flexible offerings deliver the same peace of mind larger companies enjoy at a fraction of the cost.

**“BUT WE’RE SMALL... NOBODY WOULD BOTHER TO HACK US, RIGHT?”**

***Peace of Mind, Above and Beyond, Partnership*** IT is not my area of expertise, and so I must trust a company to assure we are both functioning at the highest level and are maximally secure. It feels like our IT is being fully managed and our systems are functioning properly at 100%. I feel with Valceon they are looking ahead and will keep us up to date on what we need to be doing. It feels more like a partnership than an “outsourcing” relationship.
